Professional Summary

Level Designer & Environment Specialist with expertise in **Unreal Engine 5**. Specialized in creating immersive gameplay spaces with a focus on player flow, spatial storytelling, and technical optimization (Nanite, LODs, Lumen). Experienced in delivering high-quality stealth and co-op designs within professional studio pipelines.

Technical Skills

Engines: Unreal Engine 5 (Specialist), Unity
Level Design: Greyboxing/Whiteboxing, Combat Pacing, Player Flow, Spatial Puzzles, Navigation
Tech Art Pipeline: Optimization (Nanite, LODs), Lighting (Lumen, Volumetrics), Niagara VFX Basics
Game Design: GDD Documentation, Economy Loops, System Design, Progression Systems

Experience

Underdogs Studio (Mumbai) <i>Level Designer (Confidential Co-op Project)</i>	Dec. 2025 – Present <i>Remote</i>
- Developing synchronized co-op puzzles requiring dual-player spatial coordination and communication. - Managing split-path navigation to ensure balanced engagement for both players in professional loops. - Collaborating with lead designers to align environmental flow with core studio objectives.	
Akiyam (Gujarat) <i>Level Designer (Assassin: The First List - Steam Release)</i>	Feb. 2023 – Jan. 2024 <i>Remote</i>
- Designed and polished 4 full stealth levels from blockout to high-fidelity final environments. - Developed non-linear level architecture with strategic verticality for multiple gameplay approaches. - Designed AI guard patrol routes and encounter positioning to maximize player tension. - Utilized composition and lighting to ensure objective readability in professional environments.	

Projects

3D Hustle <i>Unreal Engine, Itch.io</i>	Jan. 2025
- Lead Designer: Authored the complete Game Design Document (GDD) and core economy loops. - Engineered progression systems and spatial navigation mechanics for a high-readability platformer. - Optimized collision and platforming geometry to maintain player momentum and flow.	
Psych Horror Prototype <i>Unreal Engine, Lumen</i>	Dec. 2024
- Designed an atmospheric horror level utilizing negative space and volumetric lighting. - Controlled emotional pacing through claustrophobic spatial design and shadow-driven storytelling.	
The Dyeing World <i>Unreal Engine, 3D Platformer</i>	Oct. 2024
Used color-coded environment shapes to naturally guide player movement through exploration zones.	
Santas Revenge (Game Jam) <i>Unity, Arena Combat</i>	Dec. 2024
Designed a linear combat arena and enemy encounter pacing under a strict 48-hour deadline.	

Education

KIIT University <i>Master's Degree</i>	2019 <i>Bhubaneswar, India</i>
Gamer2Maker <i>Game Design Certification</i>	2024 <i>Online</i>
